

Use of technologies comparison

Our philosophy of construction

	Product	Best comfort	Energy saving	Healthiness dwelling	More costs
1	Ventilated floor underground (solution against moisture)	x		x	x
2	Prefure systeme for underground (solution for underwater protection)	x		x	x
3	Prefure for foundation (solution for underwater protection)	x		x	x
4	Ventilated wall (solution against the heat)	x	x	x	x
5	Ventilated roof (solution against the heat)	x	x	x	x
6	Solar tunnel (solution to use natural light and ventilate the room)	x	x	x	x
7	Glazed porcelanaded floor (perfect shock resistance)	x	x	x	x
8	Alluminium windows with gas chamber glass (solution against the heat and external noise)	x	x	x	x
9	Glass with dimmer integrated (solution against the heat)	x	x		x
10	Radiant panel (new solution for using the air conditioning)	x	x		x
11	Home automation (for a better control of energy)	x	x		x

Medium low quality construction philosophy

	Product	Best comfort	Energy saving	Healthiness dwelling	More cheap
1	Traditional floor underground				x
2	NOTHING protection for underground floor				x
3	NOTHING foundation protection				x
4	Normal external wall				x
5	Normal roof				x
6	NOTHING Solar tunnel				x
7	Normal tile for floor				x
8	Low quality Alluminium windows without gas chamber glass				x
9	NOTHING Glass with dimmer integrated				x
10	Air conditioned traditional				x
11	Normal electric system				x

Maintenance Product		more costs in %	Maintenance in years
1	Ventilated floor underground (solution against moisture)	30%	40
	Traditional floor underground		15
2	Prefure systeme for underground (solution for underwater protection)	20%	30
	NOTHING protection for underground floor		8
3	Prefure for foundation (solution for underwater protection)	20%	30
	NOTHING foundation protection		8
4	Ventilated wall (solution against the heat)	30%	25
	Normal external wall		10
5	Ventilated roof (solution against the heat)	35%	20
	Normal roof		10
6	Solar tunnel (solution to use natural light and ventilate the room)	10%	
	NOTHING Solar tunnel		
7	Glazed porcelanaded floor (perfect shock resistance)	50%	30
	Normal tile for floor		10
8	Alluminium windows with gas chamber glass (solution against the heat and external noise)	40%	25
	Low quality Alluminium windows without gas chamber glass		10
9	Glass with dimmer integrated (solution against the heat)	20%	
	NOTHING Glass with dimmer integrated		
10	Radiant panel (new solution for using the air conditioning)	35%	15
	Air conditioned traditional		6
11	Home automation (for a better control of energy)	80%	
	Normal electric system		

Maintenance products

- Ventilated floor underground (solution against moisture)
- Traditional floor underground
- Prefure systeme for underground (solution for underwater protection)
- NOTHING protection for underground floor
- Prefure for foundation (solution for underwater protection)
- NOTHING foundation protection
- Ventilated wall (solution against the heat)
- Normal external wall
- Ventilated roof (solution against the heat)
- Normal roof
- Solar tunnel (solution to use natural light and ventilate the room)
- NOTHING Solar tunnel
- Glazed porcelanaded floor (perfect shock resistance)
- Normal tile for floor
- Alluminium windows with gas chamber glass (solution against the heat and external noise)
- Low quality Alluminium windows without gas chamber glass
- Glass with dimmer integrated (solution against the heat)
- NOTHING Glass with dimmer integrated
- Radiant panel (new solution for using the air conditioning)
- Air conditioned traditional
